The bicycle, moreover, is small, light and convenient. There are no parking problems. Another reason for its popularity is that it takes one, to one's destination with more certainty than cars or large motorbikes which are often held up in traffic jams. Then, there is the fact that the bicycle causes absolutely no pollution. It produces no noise and no smoke. Finally, it is now known that riding a bicycle is a good exercise which tones up one's muscles. No wonder, more and more people prefer a bicycle to other modes of transport.
