

12. For every positive integer 'n' $1^n + 8^n - 3^n - 6^n$ is always divisible by []
 1) 3 2) 7 3) 6 4) 10
13. A rectangle and a square has same perimeter of 40m. The length of the diagonal of square is []
 1) 10m 2) $15\sqrt{2}$ m 3) $20\sqrt{2}$ m 4) $10\sqrt{2}$ m
14. Among the following is a square of an odd number []
 1) 15876 2) 17161 3) 21904 4) 35722
15. The cube root of 3375 is []
 1) 25 2) 5 3) 35 4) 15
16. Among the following, would end with digit '1' []
 1) 123^2 2) 77^2 3) 82^2 4) 109^2
17. The number of natural numbers lie between 11^2 and 12^2 are []
 1) 18 2) 19 3) 22 4) 23
18. What will be the number of zeroes in the square of the number 9000 []
 1) 2 2) 3 3) 4 4) 6
19. The number of integers whose square is a factor of 2000 is []
 1) 3 2) 6 3) 10 4) 12
20. In how many ways two squares can be selected from a 8×8 chess board so that they are not in the same row or same column []
 1) 1500 2) 1506 3) 1568 4) 1586
21. Let n be a 3 digit number such that $n = \text{sum of the squares of the digits of 'n'}$. The number of such 'n' is []
 1) 0 2) 1 3) 2 4) More than 2
22. The least number of numbers to be deleted from the set $\{1, 2, 3, 4, \dots, 13, 14, 15\}$ so that the product of the numbers is a perfect square is []
 1) 1 2) 2 3) 3 4) 4
23. The number of primes less than 100 which have 7 as the unit digit []
 1) 6 2) 7 3) 8 4) 9
24. A student got x marks in a test. The student who got the first mark gets 48 more than this student who got x marks. If total marks of both the students is 110. The highest mark secured is []
 1) 83 2) 92 3) 79 4) 100
25. If $n = 10^{10} - 1$, the number of digit in n^3 is []
 1) 30 2) 28 3) 32 4) 27
26. If one fifth of a number added to half of it is equal to 9 less than the number. Then the number is []
 1) 20 2) 28 3) 30 4) 32
27. The denominator of a fraction is 8 more than its numerator. If 5 is added to both numerator and denominator the fraction reduces to $\frac{1}{2}$ then the fraction is []
 1) $\frac{5}{13}$ 2) $\frac{7}{15}$ 3) $\frac{9}{17}$ 4) $\frac{3}{11}$
28. How many kilograms of tea ₹80 per kilogram should be mixed with 25 kilograms of tea at ₹120 per kilogram to get a mixture of ₹105 per kilogram []
 1) 10 kg 2) 15kg 3) 20kg 4) 18kg

29. A, B, C together having ₹470 . B's money is equal to $\frac{3}{4}$ of A's money and C's money is equal to

$\frac{4}{5}$ of B's money. The amount of money having A is []

- 1) 200 2) 250 3) 150 4) 120

30. Two numbers are in the ratio 5 : 3. If they differ by 18 then the largest number is []

- 1) 35 2) 25 3) 27 4) 45

31. Half of a herd of goats are grazing in the field and three fourths of the remaining are playing near by the rest 9 are drinking water. The number of goats in the field is []

- 1) 42 2) 72 3) 62 4) 52

32. If $\frac{n}{2} - \frac{3n}{4} + \frac{5n}{6} = 21$ then the value of n is []

- 1) 46 2) 36 3) 56 4) 38

33. Mohan's mother is 20 years older him. Ten years ago, she was three times as old as Mohan was then the present age of Mohan is []

- 1) 40 years 2) 20 years 3) 30 years 4) 10 years

34. Nandita changed ₹2 into 5p, 20p, 50p coins. If the number of 5p coins was double the number of 20p coins and the 50p coins were one - fifth the 20p coins. The number of 20p coins did he get?

- 1) 5 2) 1 3) 10 4) 15 []

35. In the adjoining diagram all lengths are gives in centimeters. The area of trapezium ABCD is []

- 1) 225 cm²
2) 196 cm²
3) 114 cm²
4) 70 cm²

36. If BC passes through the centre of the circle, then area of the shaded region in the given figure is []

1) $\frac{a^2}{2}(3-x)$ 2) $a^2\left(\frac{\pi}{2}-1\right)$

3) $2a^2(\pi-1)$ 4) $\frac{a^2}{2}\left(\frac{\pi}{2}-1\right)$

37. The circumference of the circle having the diameter 7 cm is []

- 1) 22cm 2) 32cm 3) 11cm 4) $\frac{22}{7}$ cm

38. The area of shaded region in the given diagram is []

- 1) 187.25 cm²
2) 167.25 cm²
3) 177.25 cm²
4) 157.25 cm²

39. The area of the triangle whose 3 sides are 11cm, 13cm, 20 cm is []

- 1) 76 cm² 2) 66cm² 3) 56cm² 4) 46 cm²

40. A 25m long pole is broken by wind from a certain height. If its top touches the ground at a distance of 5m from its foot. The area of the triangle formed by the broken pole with ground is []
 1) 30m² 2) 35m² 3) 28m² 4) 40m²
41. The surface area of a cube is 486 cm². The side of the cube is []
 1) 18cm 2) 12cm 3) 9cm 4) 15cm
42. Bricks of sizes 20cm × 15cm × 8cm are used to build a wall whose length breadth, and height are 15m, 0.4m and 1.2m respectively. The number of bricks required is []
 1) 300 2) 400 3) 2000 4) 3000
43. An angle whose measure is more than 180° and less than 360° is called []
 1) straight angle 2) reflex angle 3) complete angle 4) right angle
44. If the sum of three angles is 232°. The first of them is complement of second and the supplement of the third then the least angle is []
 1) 38° 2) 52° 3) 142° 4) 48°

45. In the following diagram three lines AB, CD and EFG are parallel. The value of 'y' is []
 1) 50°
 2) 60°
 3) 110°
 4) 70°

46. If in an isosceles triangle $\triangle ABC$, $AB = AC$ and $\angle A = 80^\circ$. The bisector of $\angle B$ and $\angle C$ meet at D, then $\angle BDC =$ []
 1) 80°
 2) 120°
 3) 130°
 4) 160°

47. A 17m long ladder leans against wall. If the foot of the ladder is 8m away from the foot of the wall. How far up the wall the ladder reaches []
 1) 17m 2) 8m 3) 25m 4) 15m
48. In the adjacent figure BA and BC are produced to meet CD and AD produced in E and F. Then $\angle AED + \angle CFD$ is []
 1) 80°
 2) 50°
 3) 40°
 4) 160°

49. The angle between the diagonals of a kite is []
 1) 60° 2) 180° 3) 90° 4) 135°

50. In a square ABCD, E is the midpoint of AB and length of FB is $\frac{1}{3}$ rd of BC. The area of $\triangle FBE$ is 108 units. The length of AC is []

- 1) $24\sqrt{2}$ units
 2) $26\sqrt{2}$ units
 3) $12\sqrt{2}$ units
 4) $36\sqrt{2}$ units
