are from urban area ,35 girls in Commerce are from rural area and 25 girls from urban area . 30 boys in Science and 20 boys in commerce are from rural area .10 girls in Arts are from urban areas . (4)

Ques22 Represent the following by sub-divided bar diagram on percentage basis;

Particulars	1990 (Rs)	1992(Rs)
Wages	120	210
Raw-Material	80	75
Other costs	40	75
Total cost	240	360
Proceeds from sale of table	250	300
Profit\ Loss	10	60

(4)

Ques 23 Draw less than curve for the following distribution

Weekly pocket money (in Rs)	No.of teenagers
20-39	9
40-59	11
60-79	15
80-99	25
100-119	10
120-139	8

(4marks)

Ques 24 We have the following data on the monthly expenditure on food (in Rs.) for 30 households in a locality:

215	159	196	205	112	223
256	271	310	129	335	169
184	234	245	241	265	298
144	135	172	173	229	243
220	238	278	243	220	238

- I. Obtain frequency distribution, inclusive series of the given data .The class –intervals is to be taken as 50, one of the class interval is 100 -150.
- II. Draw a frequency polygon
- III. What per cent of the households spend less than Rs. 250 per month and what percent spend more than Rs. 200 per month? (6marks)
