	length light. Although	we cannot see it, we can	feel its presence just as	we can feel the l	heat as	s we

tiny fraction of the atmosphere, absorb the infrared radiation and the heat energy.

put our hand near the surface of a hot skillet or frying pan. The 'trace' gases that make up only a

In the early 1800s, the trem 'greenhouse effect' was only used to describe the naturally occuring functions of trace gases in the atmosphere. It was not until the mid 1950s that the term was coupled with the concerns over climate change. The negative concerns are related to the possible impact of an enhanced greenhouse effect, however we must not forget that without the greenhouse effect, life on earth, as we know it, would not be possible.

## Now answer the following questions.

46.	It is not a trace gas. a) carbon dioxide	b) water vapour	c) methane	d) oxygen	[	]
47.	The sun's energy reach a) visible light	b) heat energy	c) longer waves	d) infrared ra	[ .ys	]
48.	Which of the following a) undoubtedly	g can replace the wo b) slowly	ord 'eventually' given in the c) finally	e 3rd paragraph? d) probably	[	]
49.	Life as we know is not possible on earth a) without the climate change c) without the greenhouse effect		b) without the infrared radiation d) without the global warming			]
50.	Enhanced greenhouse a) positive	effect has a b) negative	_ impact on earth. c) great	d) little	[	]
