

1. From where do you assign the space for virtual memory?
  - (a) RAM
  - (b) ROM
  - (c) Hard Disk
  - (d) Both (A) and (B)
2. You see \_\_\_\_\_ error value if the formula refer, to a cell that isn't valid.
  - (a) #VALUE
  - (b) #REF
  - (c) #NULL!
  - (d) #N/A
3. A storage unit Of a computer system should be evaluated not he basis of \_\_\_\_\_.
  - (a) Access time
  - (b) Volatility
  - (c) Cost per bit of storage
  - (d) All of these
4. Which memory system is NOT used as a mass memory medium?
  - (a) Semiconductor memory
  - (b) Drum Memory
  - (c) Magnetic tape
  - (d) Magnetic disk

# Global Computer Olympiad

5. A device that program that connect your LAN to the internet, passes message between the computer on LAN

Internet is called\_\_\_\_\_.

(a) Repeater

(b) Gateway

(c) Hub

(d) Switch

6. which one of the following the type of operating system that executes programs that are guaranteed to have an upper bound on tasks that they carry out?

(a) Multi processor

(b) Distributed

(c) Networked Systems

(d) Real-Time

7. which one of the following is a system that allows each user to interact directly with the operating system via Command entered from a keyboard?

(a) Real-time system

(b) Interactive system

(c) Distributed system

(d) Embedded system

8. Which of the following is/ are a set of instruction and data that a computer's central processing unit can execute directly?

(a) 1<sup>th</sup> Generation Programming language

(b) 2<sup>th</sup> Generation Programming language

- (c) Machine Language
- (d) Both A and C
9. which one of the following is the term called for the design of a network including the devices.  
location and cable installation?
- (a) Mea topology
- (b) Physical topology
- (c) Multimedia topology
- (d) Physical structure`
10. A new presentation can be created from\_\_\_\_\_.
- (a) Design templates
- (b) Existing presentation
- (c) Blank presentation
- (d) All of these
