SAMPLE QUESTION PAPER

Final version given for printing on 27-4-04

Note: All Questions are compulsory   Max Marks-85
                                                                                                            Time   2 ½ hrs.

1.   In order to give a diet containing good quality protein to your family, you can use.

                                                                                                                                                        1

        (a)   germination
        (b)   combination
        (c)   fermentation
        (d)   conservation

1.   Name the common part present in iron toaster and geyser, which works as
        safeguard against overheating.   1

        (a)   thermostat
        (b)   fuse
        (c)   cord
        (d)   switch

3.   Malaria can be diagnosed by testing   1

        (a)   blood
        (b)   urine
        (c)   stool
        (d)   spit

4.   A child of 3 years old can speak sentences made of   1

        (a)   3-4 words
        (b)   5-6 words
        (c)   7-8 words
        (d)   10-12 words

5.   The maximum energy-giving nutrient is   1

        (a)   Minerals
        (b)   Proteins
        (c)   Carbohydrates
        (d)   Fats

6.   You will generally not find water closets in villages because they   1

        (a)   Need experts to construct
        (b)   Need a lot of water
        (c)   Are difficult to use
        (d)   Are a western form of latrine

7.   An example of human resource is   1

(a)   Money
(b)   Knowledge
(c)   Land
(d)   Material goods

8.   Give one reason why   2

(a)   You cannot use nylon for making towels
(b)   A silk saree cannot be scrubbed hard while washing.

9   Write four problems seen in society due to the lack of values.   2

10.   After doing Home Science, Rita is looking for jobs. Educate her about
four areas where she can get employment.   2

11.   Which two diseases spread through infected food and water? How can
these be controlled?   2

12.   Which cleaning material can Mala use to clean bathroom tiles and brass
taps in her home?   2

13.   List any four possible conditions when Rahul can become a victim of   2
poisoning.

14.   List any two qualities you would look for, while buying a bed sheet.   2

15.   Lokesh is 30 yrs. old. He wants to save his money for future use.
He is thinking of either buying jewelry or investing in Public Provident
Fund. Help him make a decision, giving at least two advantages for your
choice.   2

16.   State any three qualities a fabric for rainy season should have.   3

17.   Mention any four diseases that spread through air. Suggest one measure
you could take to prevent the spread of such diseases.   3

18.   What are the three most common signs of pregnancy?   3

19.   Support these three statements with the help of an example each.
Development   occurs
a) from head to legs
b) from centre of body towards outside.
c) at different rate at different age levels.   3

20.   Give three reasons why you think preserving food is necessary?   3

21.   Name any four types of fabrics available in the market. Compare any
two on the basis of their heat conduction property.   3

22.   Which six qualities should you check before buying a readymade
suit for your mother?   3

23.   Your friend Roop has just become pregnant. Keeping in mind the
statement that ' only a healthy woman gives birth to a healthy baby',

	explain to her the kind of food she should eat.	3
24.	Radha wants to decorate her home with the help of pictures. Which three steps of planning she should keep in mind, before evaluating the decoration of her house?	3
25.	Why are consumer aids important to a consumer? Describe any two such aids.	5
26.	What are the major points you must keep in mind while selecting a house?	5
27.	How will you help your younger sister to prepare for marriage?	5
28.	Convince your friend about the need to save money from her monthly expenditure.	5
29.	There was a fire at Sheela's house. Identify six possible causes for this.	5

31.	Describe the removal of garbage from your home. How frequently do you remove it? Why? What precaution will you take if you have to keep it for a day? Why?	5

Answers

1.	B		1
2.	A		1
3.	A		1
4.	A		1
5.	D		1
6.	B		1
1.		B	1

8.
   a) Does not absorb moisture easily.   1+1=2
   b) Silk looses strength when wet.

9. Problems -

   1. Lack of punctuality in schools, offices, shops.
   2. Disrespect to elders, parents, teachers, employees etc.
   3. Gender discrimination
   4. Indiscreet use and wastage of resources
   5. Rude behavior
   6. Insensitive to the needs of disadvantaged

                                          (Any four)   4X ½ = 2

Ans. 10 She can get employed in

   i) Polytechnics
   ii) Industrial Training Institute
   iii) Institute of Hotel Management
   iv) Angan wadi/Balwadi Centres
   v) Home Science Colleges
   vi) Schools offering Home Science and Vocational Courses.

                                          (Any four)   4X ½ = 2

Ans. 11 Diseases – diarrhoea, Cholera, Jaundice   (Any 2)   1
   Precautions – Drink boiled or treated water.   1
   - keep all food covered to prevent contamination by flies.   1+1 = 2

Ans. 12   For Bathroom tiles
                 Soap, Vim, Water   1

                 For Brass taps   1
                 Tamarind/lemon/dry mango powder   1+1 = 2

Ans. 13 i) Consuming expired medicines
   ii) Handling insecticides in kitchen.
   iii) Eating unwashed fruits and vegetables.
   iv) Drinking contaminated water.
   v) Eating contaminated food.
   vi) Acids and alkalis.

                                          (Any four)   4x½ = 2

Ans. 14 i)   colour fastness
        ii)   strength of the fabric
        iii)   softness of bedsheet – matched
        iv)   colour of bedsheet – matched with colour of rooms/curtains.

                                                        (Any two)   1x2 = 2

Ans. 15 He should invest in PPF because
        a)   he gets a tax rebate
        b)   he can take a loan against it
        c)   small amount of money is deducted every month
        d)   employer also puts in the same amount of money
                                                        (Any two)   1x2 = 2

Ans. 16 i)   It should dry fast.
        ii)   It should not wrinkle when wet.
        iii)   It should not lose strength when wet.
                It should be of a fast colour.
                                                        (Any three)   1x3 = 3

Ans. 17 Four diseases
        Influenza ,Diphtheira
        Measles,Mumps or any other   1X4 = 2

        Measures
        Cover mouth while coughing or sneezing.   1
                                                        2+1= 3

Ans. 18 i)   Missed period
        ii)   Morning sickness/nausea
        iii)   Increase in frequency of urination
        iv)   Changes in the breast.
        v)   Digestive upsets.

                                        (Any Three)   1X3 = 3

Ans. 19   a)   First, the child gains control over the head, then the child gains
                control of the trunk and then is able to sit and then stand.
           b)   In the beginning, child grasps toys with whole body, then both arms, then both
                   hands, then only with fingers.
           c)   In the first six years of life and adolescence the pace of growth is very fast but slows
                   down during childhood and later years.   1X3 = 3

Ans: 20 -   Adds variety in the diet
         -     Makes food easy to store.   1X3 = 3
               Food can be made available every where.

Ans: 21 Fabrics available   ½ x4 = 2
         Cotton/Wool/Silk/Nylon/Polyester/Rayon   (Any 4)

         Cotton/rayon is a good conductor of heat and keeps the body cool.
                                                         ½ x 2 = 1

	Wool/Silk/Nylon/Polyester are bad conductors of heat and keep the body warm.		1+2 = 3
Ans. 22	a) Seams should be finished properly b) Seam allowance should be adequate c) Garment should be stitched on the grainline. d) Fasteners firmly stitched e) Finishing of garment should be satisfactory f) Quality of fabric should be good.		½ x 6

Ans.23 .	a) Eat a dry piece of toast/ biscuit before getting up from bed
	   to avoid morning sickness
	b) Eat raw salads, fruits and drink plenty of fluids to avoid constipation
	c) Eat regular and balanced diet
	d) Avoid spicy and fried food that increases digestive upsets
	e) Eat small but frequent meals
	f) Eat last meal at least 2-3 hours before bed time
	
	                                                          (Any three)
			1x 3 = 3

Ans.24	i) Planning- Activities have been properly listed and sequenced
	ii) Organizing- Responsibilities have been fixed and all the resources have been
	     collected and assembled.
	iii) Implementing- Activities have been implemented as per the planning and
	      organizing.
			1x3 = 3

Ans.25	A consumer aid is anything written or illustrated that helps and guides a consumer in selecting a product he/she wants to buy. Describe any two of the following - i) standardization marks ii) labels and catalogues iii) packages iv) advertisement v) consumer associations and cooperatives.		1x 1=1 2x2=4 1 + 4 = 5

Ans. 26	Points to consider
	    - adequate sunlight
	    - proper ventiliation
	    - clean surroundings
	    - no loud noise
	    - good locality with basic amenities like school markets, hospital, post-
	          office, bank etc.
	    - budget
	    - according to requirements (Any 5)
			1X5 = 5

Ans. 27	You will i) help her to develop confidence in herself. ii) inculcate in her a healthy respect for the opposite sex iii) explain to her the reproductive system. iv) Educate her about the reproductive system		1X5=5

v) Emphasize the importance of child spacing and breast feeding		
Ans. 28 Your friend must save money every mouth because she will need it for-		
i) education of children		
ii) marriage of children		
iii) emergencies such as medical needs/damage to property etc.		
iv) making her family life comfortable.	1X5=5	

Ans.29
     i)   misuse of matches, hot ashes/ cigarettes thrown carelessly
     ii)   carelessness while lighting/pumping stove.
     iii)   unattended stove
     iv)   gas leakage
     v)   sparking in faulty wiring in kitchen

1X5=5

Ans. 30 Specific requirements

- energy giving (more calories)
- more protein
- more minerals and vitamins
- attractive, nutritious snacks.

1/2X4=2

1x2=2

Suggestions

- stuffed parantha with chutney
- stuffed kulcha with chole
- vegetable sandwiches
- mixed vegetable raita
- peanut chikki
- stuffed omlette
- idli sambhar

1

Justification for the choice to be given

2+2+1= 5

31. Removal – kitchen   dustbins   municipality dustbin
Frequency   -   at least daily
Reason -   garbage decays and produces foul .
Precaution   -   collect in a clean dustbin, keep covered
Reason -   dirty dustbin attracts insects, cockroaches, fires, spreads foul smell.

1X5= 5
