- Q.1 What do you mean by casting? Explain by example. 2
- Q.2 Explain any two advantage of petty cash book. 2
- Q.3 What is contra entry? Explain by example. 2
- Q.4 Write any three difference between bills of exchange and promissory note. 3
- Q.5 What do you mean by depreciation? Explain any two needs of depreciation. 3
- Q.6 Write any three difference between Trial Balance and Balance Sheet. 3
- Q.7 Prepare opening entry from following balances 3

| Particulars | Amount (₹) | Particulars | Amount (₹) |
|------------------|------------|----------------|------------|
| Creditors | 15000 | Machinery | 40000 |
| Debtors | 22000 | Capital | 60000 |
| Bills receivable | 25000 | Cash | 18000 |
| Bills Payable | 23000 | Loan from bank | 12000 |

- Q.8 Define personal account and Nominal account and write debit- credit rules for both. 4
- Q.9 Prepare accounting equation from following transactions 4
- (a) Business started with cash and stock ₹ 50,000 & ₹ 20,000 respectively.
- (b) Goods purchased ₹ 30,000 from Govind. (2% cash discount, 50% cash paid)
- (c) Machinery purchased on credit ₹ 18000
- (d) Goods sold to Kailash (cost ₹ 20,000 ; Profit 25% on cost)
- Q.10 Prepare closing entries for following account 4
- (a) Wages A/c (b) sales return A/c (c) Profit and loss A/c (net profit) (d) Drawings A/c
- Q.11 Calculate maturity date for following bills 4
- | Date of bill | Duration |
|-----------------------|----------|
| (a) January 16, 2016 | 120 days |
| (b) August 2, 2016 | 2 months |
| (c) November 12, 2015 | 90 days |
| (d) October 26, 2015 | 3 months |
- Q.12 On 1st Jan. 2012 a firm bought a machine for ₹ 270000 and spent ₹ 18000 on its installation and ₹ 12000 on its carriage. Estimated life of the machine 10 years & estimated scrap value of machine ₹ 60000. Find the amount of Depreciation and prepare machine account for two years? 4
- Q.13 Prepare sales book from following transactions 4
- April 4, 2014 Goods sold to Nakoda traders
- 40 coolers @ 2400 each
- 60 Fans @ 1200 each
- 30 mixers @ 1500 each
- Trade discount-10%

Q.19 P sold goods of ₹ 15000 to Q. on 1st Jan. 2010 and draws a bill on the same day for three months. Q accepts it and returns it to P, who discounts it on the same date with his bank at 12% P.A. The bill is dishonored on the due date and the noting charges were paid by bank ₹ 500. on 4th April 2010 Q paid ₹ 5000 and noting charges in cash and accepts a bill at two months for the amount due to P together with interest at 12% per annum. On the due date of new bill, Q paid amount of bill with 2% discount. Pass journal entries to record these transactions in the book of Q. 8

Q.20 From following trial balance prepare financial statement 10

Trial balance for the year ending 31-03-2016

| Debit balances | Amount | Credit balances | Amount |
|------------------|---------------|-----------------|---------------|
| Opening stock | 23000 | Sales | 250000 |
| Wages | 6000 | Purchase return | 10000 |
| Carriage inwards | 4000 | Commission | 13000 |
| Furniture | 75000 | Capital | 177000 |
| Goodwill | 12000 | Creditors | 22000 |
| Royalty | 8000 | Bills payable | 15000 |
| Discount | 3000 | Rent | 4000 |
| Salaries | 15000 | Discount | 3000 |
| Debtors | 32000 | | |
| Cash in hand | 16000 | | |
| Bills receivable | 18000 | | |
| Building | 95000 | | |
| Bad debts | 7000 | | |
| Interest | 2000 | | |
| Drawing | 8000 | | |
| Purchase | 150000 | | |
| Sales return | 20000 | | |
| Total | 494000 | Total | 494000 |

Closing stock ₹ 28000

SECTION – A 20 Marks READING

Q1. Read the passage given below and answer the following questions:

Monopolies are bad in national politics and worse in international politics. The unipolar world led by the US is an example of political monopoly. In the language of history and politics, monopolies are discussed in terms of balance of power. What we have today is an imbalance of power. The US- led war against Iraq needs to be seen in the context to this imbalance. There has been much talk about the need for a multi polar world as an ideal solution to the existing anarchy in the international arena. The US and UK combine have been considered to be the perpetrators of the war. They disregarded global public opinion and have gone outside the mandate of the United Nations. This is an indication of the US considering it the only super power. Its might is in two domains: one, military and the other, economic. On every issue of any importance that confronts foreign policy making of any country, the US interests become vital. This omnipresence of the US makes it different from any other country. Some political observers argue that this is temporary. But we are moving from a bipolar to a multipolar world. In dealing with a big power, a smaller power must choose either balancing or hiding or opposing. In a unipolar world, the general trend of foreign policy will be to oppose. Middle powers will need to oppose less than small powers and on particular issues may be able to balance or hide.

A1.1 Choose the correct options

1×6=6

- (a) For initiating the war, the author of the passage
- (i) Apprecates the joint action of US and UK.
 - (ii) Consider the war as unjustified and blames the US and UK.
 - (iii) Thinks that the United Nations should have admired the US and UK.
 - (iv) Blames the Global Public Opinion.
- (b) According to the author, the world is heading towards.
- (i) Multipolar from Bipolar
 - (ii) Bipolar from Unipolar
 - (iii) Bipolar from Multipolar
 - (iv) Unipolar from Multipolar
- (c) The Unipolar world led by the US is an example of.
- (i) Economic monopoly
 - (ii) Social monopoly
 - (iii) Political monopoly
 - (iv) Cultural monopoly.
- (d) Who are considered as perpetrators of the war?
- (i) US
 - (ii) UK
 - (iii) Both
 - (iv) None of the Above
- (e) The Word “Omnipresence Means”.
- (i) Not present everywhere
 - (ii) Found only at a particular place
 - (iii) Present everywhere
 - (iv) Rarely Found
- (f) The word “Perpetrators” means.
- (i) Beginners
 - (ii) Latest
 - (iii) Motivators
 - (iv) Creators

A.1.2 Answer the following Questions-

1×6=6

- (a) What is considered bad in politics?
- (b) US led war against which country?
- (c) What is an ideal solution to the existing anarchy in the international arena?
- (d) In which two domains US have its might.
- (e) What choices smaller power has in dealing with a big power?
- (f) Who will need to oppose less the big power.

Q.2 Read the passage give below and answer the following questions.

Corruption in "India"

Power tends to corrupt and absolute power corrupt absolutely.

Corruption is a global phenomenon and it is Omni present. Corruption has progressively increased and is now rampant in our society.

Corruption in India is a consequence of the nexus between Bureau curacy, politics and criminals. India is now no longer considered a soft state . Today, the number of ministers with an honest image can be counted on fingers At one time, bribe was paid for getting wrong things done but now bribe is paid for getting right things done at right time.

India is among 55 of the 106 countries where corruption is rampant, according to the corruption perception index 2004 report released by Transparency international India the caves of corruption are many and complex. Emergence of political elite who believe in interest – oriented programmers, artificial scarcity created by the people, change in the value system and ethical qualities of men who administer, tolerance of people towards corruption, Complete back of public outcry against it. For eradicating corruption Foolproof laws should be made and the role of politicians should be minimized. Cooperation of the people has to be obtained for it. Local bodies independent of the government like LOKPALS, CVC'S etc should be formed. A new fundamental right via. Right to information should be introduced, which will empower the citizens to ask for the information they want. Stringent actions against corrupt officials will certainly have a deterrent impact.

2.1 On the bases of your reading of the above passage makes notes unit using heading & sub – heading. 5

2.2 Write a summary of the above passage based on your notes. 3

Section - B (Writing & Grammar - 30 Marks)

Q.3 Design a poster on "Swatch Bharat Abhiyan" You may use Slogans. 4

OR

You are secretary of the English club of your school. You plan to organize an educational tour to Rajasthan during the winter vacation. Prepare matter for the school notices board in about 50 words, mentioning the schedule of the tour, expenses to be in cured, permission letter from the parents and last date for giving names.

Q.4 You are Dina / Ravi. You have heard your teacher talk to your class about the importance of inculcating the reading habit you name taken down same notes with two help of the given information and your own ideas write an article on the topic:- "Books are our friends forever" in 150 Words. 6

Reading: - Excellent diversion; Pleasant hobby; helps connect with noblest minds of the ages.
Books - Shape Character, best companions in loneliness.

Q.5 You are R. Ashokan estate Manager, Loreto convent school, Shimla. The Principal of the school has asked you to place an order for two Mahindra Buses. Place the order with Mahindra Automobiles, Delhi. 10

- Q.6 Reading the following passage and write the missing word along with the word that comes before and the word that comes after it. 8×½ =4

When I knocked at main door (a) _____
There was reply. I (b) _____
Waited for time (c) _____
I felt little annoyed (d) _____
With man. He had (e) _____
Made requests to me (f) _____
To visit house (g) _____
Suddenly old man appeared there (h) _____

- Q.7 Fill in the correct form of verbs given in the brackets 8×½ =4
I (**Study**) in this college for two years and up to now I (**Have**) no difficulty to satisfying my teachers. Last week one day, I (**Take**) "French Leave" in the afternoon and (**Go**) to see a film. I..... (**Enjoy**) it very much. My favourite stars (**act**) in it and they have acted very well. I went out during the interval and I (**Notice**) a tall man, who (**Stand**) near the tea stall.

1×2=2

- Q.8 Rearrange the words to make a meaningful sentence
(i) Foremost / was the / period / Leonardo / of / his / painter.
(ii) String / I wanted / some / was none / there / but / house / in the.
SECTION – C (LITERATURE - 30 Marks)

- Q.9 Read the extract from the poem and answer the following questions : 1×3=3

And who art thou? Said I to the soft falling shower,
Which, strange to tell, gave me an answer, as here translated;
I am the poem of Earth, said the voice of the rain.

- (i) What did the poet ask?
(ii) Why was it "strange to tell"?
(iii) What does the rain call it self? Why?
- Q.10 Answer **any three** from the following questions : 3×3=9
- (i) There is a parallel drawn between rain and music in the poem. 'The voice of the Rain'. Explain the similarity between the two.
(ii) What does the word "Cardboard" denote in the poem 'A photograph'? Why has this word been used?
(iii) What is propagated by the concept of sustain able expansion?
(iv) What generated the interest of the world in king Tut?
(v) "I think it's not facts that matter but ideas". To whom did Albert Einstein say this and why?
- Q.11 Answer the following questions in 150 words :

- (i) Why was Albert Miserable in Munich?

6

OR

Comment on the influence of English the language and the way of life- On Indian life as reflected in the story Ranga's Marriage. What is the narrator's attitude to English?

- (ii) "The Earth's vital signs reveal a patient in declining health". What are these "Vital sign"?

6

OR

What are the four systems that sustain life on earth? What threats are they facing?

- (iii) Mother's Day is a humorous and satirical depiction of the status of the mother in the family. What are the issues it raises? Do you agree with the resolution?

6

OR

How did Virginia come across the ghost of Sir Simon de Canterville? What revelations did the ghost make before her?

- Q.1 Identify the generation of computers. Following keywords belong to (Any Six) : $\frac{1}{2} \times 6 = 3$
- (i) Transistor (ii) Vacuum tube (iii) Magnetic tapes
(iv) Integrated circuits (v) VLSI (vi) Micro computer
(vii) Parallel processing
- Q.2 Write any three major strengths and weaknesses of computer? 2
- Q.3 What are memory devices? Discuss RAM and ROM in detail? Also tell the reason to use secondary memory. $1+2+1=4$
- Q.4 What is the difference between data and information? 1
- Q.5 Why does computers only understand binary codes? 1
- Q.6 Explain the role of a compiler in a programming language. What type of errors it generally reports? 3
- Q.7 Explain difference between call by value and call by reference with example. 4
- Q.8 Difference between formal parameters and actual parameters. Also, give a suitable C++ code to illustrate both. 4
- Q.9 Explain differences between UDF and library functions. 2
- Q.10 Describe : (with example) 4
- (i) strlen () (ii) strcat () (iii) strcpy () (iv) strcmp ()
- Q.11 Write programs for the followings :
- (i) WAP to print Max no from 2 nos. (simple if) 2
- (ii) WAP to check whether a given no is Armstrong or not. 2
- (i) WAP to add two ID arrays and create a new array as a result then show the contents of that new array. 3
- (ii) WAP to find second Max no from ID array. 3
- (iii) WAP to calculate and display total no of vowels and consonants in a string. 3
- (iv) WAP to print transpose of Matrix. 2
- (v) WA function to check whether a given no is prime or not. 2
- (vi) WA function to add 2 in all even number in ID array. 3
- Q.12 (i) Write outputs be the output of following code fragment when the input is – 2
- (a) 'A' (b) 'C' (c) 'D' (d) 'F'
- ```
cin>>ch;
Switch (ch)
{
 case 'A' : cout << "Grade A\n";
 case 'B' : cout << "Grade B\n";
 case 'C' : cout << "Grade C\n";
 break;
 case 'D' : cout << "Grade D\n";
 default : cout << "Grade F\n"; }
```
- (ii) Predict the output of following codes.  $1 \times 5 = 5$
- (a) If (!3)
- ```
{ cout << "Tricky \n";
} cout << "yes";
```

- (b) If (3)
 cout << "Tricky again";
 else
 cout << "Am I right?"
 cout << "no???";
- (c) If (0)
 cout << "Third time tricky";
 cout << "Am I right?";
- (d) If (!0)
 cout << "Fourth time again \n";
 cout << "No???";
- (e) If (0)
 cout << "Plz Not again \n";
 else
 cout << " Promise, this the last time";
 cout << " Thank God";

(iii) # include < iostream.h> 3
 void Execute (int & X, int Y = 200)
 {
 int TEMP = X+Y;
 X+=TEMP;
 If (Y! = 200)
 Cout << TEMP << X <<Y<<endl;
 }
 Int main ()
 {
 int A = 50, B=20;
 Execute (B);
 cout << A<< B<<endl;
 Execute (A,B);
 cout<<A<<B<<endl;
 Return 0;
 }

(iv) int a [10] = { 1,2,3,4,5,6,7,8,9,10}; for(int i = 0; i < 10; i++); 3
 a [i -2] + 7;
 a [3]× = 5 ;
 i = i - 4 ;
 a [i -2] + = 4;
 for (i = 0; i < 10 ; i ++)
 cout << a [i] ;

Q.13 What do you understand with default argument function? Also give a suitable example. 5

Q.14 What do you mean by local and global scope of variables. Give example too. 4

- Q.23 Woman in rural areas are ready to work even at low wages why? **3**

- Q.24 Explain the role of credit system in Rural development. **3**

- Q.25 Explain the statement that green revolution enabled the Government to procure sufficient food grains to build its stock that could be used during times of shortage. **4**

- Q.26 Explain how import substitution can protect domestic industry. **4**

OR

Explain important and need of economic reforms since 1991.

- Q.27 What is organic farming and what are its advantages? **4**

- Q.28 Explain the steps taken by the Government in developing rural markets. **6**

- Q.29 Education is an important ingredient of growth. Comment. **6**

OR

Explain importance of Education in human capital formation.

- Q.30 Explain various reforms in different sector of economy and their impact. **6**

ORAL → **10**

****Best of Luck****

- Q.25 (i) Define lattice enthalpy and bond order
(ii) Draw the structure of PCl_5 , C_2H_4 , BCl_3 .

OR

- (i) Write the main Postulates of VSEPR theory
(ii) Explain the Fajan rule
- Q.26 (i) Explain Dual behaviour of matter and Heisenberg uncertainty principle.
(ii) What do you mean by spectrum? Explain its types.

OR

- (vii) Write the limitation of Bohr Model.
(viii) Explain the quantum numbers.

Best of Luck

Roll. No. Code No. 11/Chemistry/NLCS/32

Half Yearly Examination 2016 – 17

Time: 3:00 Hrs.

M. M. 70

General Instruction :

All Questions are compulsory.

Question No. 1 to 5 carry One Mark each.

Question No. 6 to 10 carry Two Marks each.

Question No. 11 to 22 carry Three Marks each.

Question No. 23 is a value based carrying Four Marks each.

Question No. 24 to 26 carrying Five Marks each.

- Q.1 Write the IUPAC name $CH_2 = CH - CH(CH_3) - CH_3$.
- Q.2 What do you mean by inert pair effect?
- Q.3 Define empirical formula.
- Q.4 Define Law of Triad. Give one example.
- Q.5 Write the van der waals equation.
- Q.6 Calculate the mass percent of solute and solvent. If 2g of substance A is added to 18g of water.
- Q.7 Draw the Lewis structure of NO_2^- and NF_3 .
- Q.8 At $25^\circ C$ and 760 mm of Hg pressure a gas occupies 600 ml volume. What will be its pressure at a height where temperature is $10^\circ C$ and volume of the gas is 640ml.
- Q.9 What causes temporary and permanent hardness of water?
- Q.10 How the Boron family property changes –
(i) Electronegativity (ii) Atomic Radii
- Q.11 Determine the molecular formula of an oxide of iron in which the mass percent of iron and oxygen are 69.9 and 30.1 respectively given that molar mass of oxide is 159.9 mol^{-1} .

Q.12 Calculate the wavelength, frequency and wave number of light wave whose period is 5.0×10^{-10} sec.

Q.13 Explain Ionization enthalpy, electronegativity, electronegativity.

Q.14 Write the postulates of kinetic molecular theory.

Q.15 (i) Define extensive and intensive properties.

(ii) Explain Hess's law with example.

Q.16 Find out the value of equilibrium constant for the following reaction at 298K $2NH_3 + CO_2 \rightarrow NH_2CONH_2 + H_2O$ $\Delta G^0 = -13.6 \text{ KJ / Mol}$.

Q.17 Define – (i) syngas (ii) water gas (iii) fuel cell

Q.18 Explain why Beryllium show Anomalous behavior.

Q.19 Explain the reactivity of alkali metal with air, water, halogens.

Q.20 What happens when :

(i) Borax is heated strongly

(ii) Boric acid is added to water

(iii) BF_3 is reacted with ammonia

Q.21 (i) Define Nucleophile and Electrophile

(ii) Define homolytic and hetrolytic cleavage

Q.22 Write the combustion reaction of –

(i) Butane (ii) Hexyne (iii) Toluene

Q.23 Hybridisation is the intermixing of energy among two or more half filled or fully filled orbitals of comparable energy to form same number of hybrids. Hybrids have identical energies and similar shape. The tetrahedral structure involves Sp^3 hybridization, trigonal planar structure involves Sp^2 hybridization and linear structure involves Sp – hybridization. Greater is the S-character of the hybrid orbital, the smaller is its size.

(i) What are the characteristics of Sp^3 hybridization

(ii) What are the characteristics of Sp^2 hybridization

(iii) What are the characteristics of Sp – hybridization

(iv) What are the hybridization states of each carbon atom

(a) $CH_3 - CH = CH_2$ (b) $CH_2 = C = O$

Q.24 Complete the reaction :

OR

Half Yearly Examination 2016 – 17

Time: 3:00 Hrs.

M. M. 100

General Instruction :

- (i) All Questions are compulsory.
- (ii) This Questions paper contain 29 Questions.
- (iii) Questions 1 – 4 in Section A are very short Answer type Questions carrying One Mark each. Questions 5 – 12 in Section B are sort Answer type Questions carrying Two Marks each. Questions 13 – 23 in Section C are long Answer I type Questions carrying Four Marks each. Questions 24 – 29 in Section D are long Answer II type Questions carrying Six marks each.

Section - A

- Q.1 Let $A = \{ 1, 2 \}$ and $B \{ 3, 4 \}$. Find the number of relations from A to B.
- Q.2 How many chords can be drawn through 15 points on a circle?
- Q.3 Expand $\left(x^2 + \frac{3}{x} \right)^4$ using Binomial theorem.
- Q.4 Write the slope of line $3x - 4y + 1 = 0$.

Section - B

- Q.5 Let \cup be the set of all triangles in a plane. If A is the set of all triangles with at least one angle different from 60° , what is A' ?
- Q.6 Solve the trigonometric equation for general solution -
 $\tan^2 x + \cot^2 x = 2$.
- Q.7 Simplify $z = \frac{(2+3i)^2}{1+i}$ and express result in $a + ib$ form.
- Q.8 In how many ways 4 boys and 6 girls be seated in a line so that no two boys may sit together?
- Q.9 In how many ways can 3 letters be posted in 4 letter boxes?
- Q.10 Find the middle term in the expansion of $\left(x + \frac{1}{x} \right)^{10}$.
- Q.11 Write the equation of line perpendicular to line $3x + 2y + 1 = 0$ and passing through point $A(-2, 3)$.

Q.12 Find the equation of a line whose slope is $\frac{3}{4}$ and y -intercept is -5 .

Section - C

Q.13 180 students appeared in two papers in Mathematics. 148 students passed in paper I and 132 students passed in paper II. If 128 students passed in both, find the number of students who failed in both.

OR

Prove the following, using Laws of sets and not by using example.

$$A - (B \cup C) = (A - B) \cap (A - C).$$

Q.14 Find the domain and range of $f(x) = \sqrt{16 - x^2}$, here x is a real number.

Q.15 Prove that $\tan^2\left(\frac{\pi}{4} + \theta\right) = \frac{1 + \sin 2\theta}{1 - \sin 2\theta}$.

Q.16 Prove by using principle of Mathematical Induction :

$$1^3 + 2^3 + 3^3 + \dots + n^3 = \frac{n^2(n+1)^2}{4}, \text{ here } n \in N.$$

Q.17 If $z = \frac{1 + \cos \theta + i \sin \theta}{1 + \cos \theta - i \sin \theta}$, then prove that $|z| = 1$.

OR

$$\text{If } x + iy = \frac{a + ib}{c + id}, \text{ then prove that } x^2 + y^2 = \frac{a^2 + b^2}{c^2 + d^2}.$$

(You have to prove this by not using “Conjugate Method” or “Modulus Method”.)

Q.18 A firm has 600 litres of a 12% solution of acid. How many litres of a 30% acid solution must be added to it so that acid content in the resulting mixture must be more than 15% but less than 18%?

Q.19 Prove that ${}^nC_r + {}^nC_{r-1} = {}^{n+1}C_r$.

OR

There are 8 consonants and 6 vowels. How many words of 7 letters can be formed if they are to contain 4 consonants and 3 vowels?

Q.20 Prove that there is no term having x^4 in the expansion of $\left(\frac{x^2}{2} + \frac{1}{x}\right)^9$.

Q.21 Find three numbers in GP whose sum is 21 and whose product is 216.

Q.22 The first, second and the last terms of an AP are a, b, c respectively.

$$\text{Show that the sum of the AP is } S = \frac{(b+c-2a)(a+c)}{2(b-a)}.$$

Q.23 Find the equation of the line passing through the point $(1, 3)$ and making an angle of 45° with the line $x - 3y + 4 = 0$.

Section - D

Q.24 Prove that : $\tan A + \tan\left(\frac{\pi}{3} + A\right) + \tan\left(\frac{2\pi}{3} + A\right) = 3 \tan 3A$.

Q.25 Using PMI prove that : (Here $n \in N$)

$$1^2 + 3^2 + 5^2 + \dots + (2n-1)^2 = \frac{n(2n-1)(2n+1)}{3}.$$

Q.26 Find the number of permutations that can be had from the letters of the word DAUGHTER :

- (i) taking all the letters together
- (ii) beginning with G.
- (iii) H and E at the extreme (starting and ending) positions.
- (iv) Vowels being always together.
- (v) Consonants being always together.
- (vi) T and R should be next to each other.

Q.27 If a and b are the roots of $x^2 - 3x + p = 0$ and c and d are roots of $x^2 - 12x + q = 0$ where a, b, c, d are in GP. Show that

$$(q + p) : (q - p) = 17 : 15.$$

OR

If a, b, c, x are all real and $(a^2 + b^2)x^2 - 2b(a + c)x + b^2 + c^2 = 0$ then show that a, b, c are in GP. Also find their common ratio.

Q.28 A line is such that its segment between the lines $5x - y + 4 = 0$ and $3x + 4y - 4 = 0$ is bisected at the point $(1, 5)$. Obtain its equation.

OR

If p and q are the length of perpendiculars from the origin to the lines $x \cos \theta - y \sin \theta = k \cos 2\theta$ and $x \sec \theta + y \csc \theta = k$ respectively.

$$\text{Then prove that } p^2 + 4q^2 = k^2.$$

Q.29 Find the coefficient of a^4 in the product $(1 + 2a)^4 (2 - a)^5$, using binomial theorem.

- Q.26 A bob of mass m is suspended by a light string of length ℓ . It is imparted a horizontal velocity v_0 at the lowest point A such that it completes a semi circular trajectory in the vertical plane with the string becoming slack only on reaching the top most point C. Shown in figure obtain expression for v_0, v_B and v_C ,

OR

Define satellite. Find expression for orbital velocity height of satellite, time period of satellite, Binding energy, total energy & escape velocity of satellite.

Best of Luck

Roll. No. Code No. 11/Physics/NLCS/32

Half Yearly Examination 2016 – 17

Time: 3:00 Hrs.

M. M. 70

Question No.1 to 5 carry One Mark each.

Question No.6 to 10 carry Two Marks each.

Question No.11 to 22 carry Three Marks each.

Question No.23 Value Based Question carry Three Mark.

Question No.24 to 26 carry Five Marks each.

- Q.1 An arrow is shot from a bow. What is the source of energy?
- Q.2 Why a spring balance show wrong measurement after long use?
- Q.3 What is the time period of a simple pendulum of length 50cm placed in an artificial satellite?
- Q.4 What is the condition for the following formula to be valid –

$$\text{average velocity} = \frac{\text{initial velocity} + \text{final velocity}}{2}$$
- Q.5 Why ice at 0°C is found to be colder than water at 0°C ?
- Q.6 There is a limit beyond which the polishing of the surface increase frictional resistance rather than decreasing it? Explain.
- Q.7 State and prove work energy theorem for variable force.
- Q.8 Two quantities A and B are measured as $A=(1.0 \pm 0.2)\text{m}$ and $B=(2.0 \pm 0.2)\text{m}$. How will you represent the correct value for \sqrt{AB} .
- Q.9 A structural steel rod has a radius of 10 mm and length of 1m. A 100 KN force F stretches it along its length. Calculate (a) the stress (b) elongations and (c) strain on the rod. Given that young modulus $Y = 2 \times 10^{11} \text{ N/m}^2$.

- Q.10 Prove that torque $\tau = I\alpha$ where I is moment of inertia and α is angular acceleration.
- Q.11 State all three Kepler's laws of planetary motion.
- Q.12 State Zeroth Law of thermodynamics and explain it.
- Q.13 State and prove Torricelli's theorems.
- Q.14 Explain why an air bubble in water rises from bottom to top and grow in size.
- Q.15 Derive an expression for the excess pressure inside a liquid drop.
- Q.16 Define all three modes of heat transfer with a suitable example.
- Q.17 In a test experiment on a model aeroplane in a wind tunnel, the flow speeds on the upper and lower surfaces of the wing are 70m/s and 63 m/s respectively. What is the lift of the wing if its area is 2.5 m^2 ?
Density of air = 1.3 kg/m^3 .
- Q.18 Find moment of inertia of a ring about axis of rotation.
- Q.19 State and prove conservation of mechanical energy with freely falling body.
- Q.20 Write the dimension formula for following physical quantities –
(i) Young Modulus (ii) viscosity (iii) Reynold's number (iv) work
(v) Force (vi) Radius of gyration.
- Q.21 Find variation of g with height and depth.
- Q.22 Define Magnus effect.
- Q.23 The elastic behaviour of solids can be explained by considering the microscopic nature of solid. Here, the atoms or molecules are regarded as bounded by interatomic or intermolecular forces. When external deforming force is applied. The atoms or molecules get displaced from the position of stable equilibrium. They have tendency to come back to the original position giving**

rise to restoring forces. The deforming force may cause change in length or volume or shape or combination of these. The elastic property of a body is measured numerically by modulus of elasticity or coefficient of elasticity.

Answer the following Questions :

- (i) **A wire is cut into two equal parts. How does this affect Young's modulus of wire?**
- (ii) **What is the effect of temperature on modulus of elasticity of solids?**
- (iii) **Write an expression for elastic potential energy stored in a deformed wire.**
- (iv) **Define poisson's ratio.**

- Q.24 Prove that the sum of static pressure and dynamic pressure is always constant.

OR

State and prove Bernoulli's theorem for ideal liquid.

- Q.25 (i) Define elastic collision between two bodies.
(ii) Prove that in case of perfectly elastic collision of two body of equal mass after collision both bodies interchange their velocities.

OR

- (i) Define projectile motion. Find expression for (a) path of projectile (b) max height of projectile (c) time of flight (d) range of principle
- (ii) The position of particle is given by $\vec{r} = 3t\hat{i} - 2t^2\hat{j} + 4t\hat{k}$ find velocity and acceleration at $t = 2 \text{ sec}$.
