### Section- A Precis Writing – 15 marks

### Please re-write the following passage to about 100 words and also title it.

These are two considerations which deserve at least a word in any discussion of the future of the Indian theatre. The first is the rapid development of the cinema as a competitive for prophesied favor. At first, in the early flush of cinematic triumph people-some of whom might have been expected to, know better-prophesies the extinction of the theatre. It is now clear that though here and there, temporarily, the theatre may be affected, the cinema cannot hope to replace the stage and elbow it out of existence. Experience in the West has shown that the stage will always be required as a federal studio. For the technique is different and great stage actors have, always, to their disgust, discovered that film acting is at least only second best to them; it cannot mean to them what the stage means. Something is lacking in the human touch. In the theatre heart responds to heart and mind acts on mind in a way unknown to the cinema. Thus there is no danger of extinction to the theatre. On the other hand, the rivalry of the screen ought to and will put theatre to a new test and give it a new stimulus that may well lead to still higher planes of artistic achievement. Finally, a word about a national language spoken, written and thought might do for the theatre in India. With the new awakening in social life the need of a common tongue is being increasingly felt. Much work is being done to bring out a common linguistic medium. The day when, it is accepted will be a great day for the Indian theatre, as it will be for all art in the country. But the theatre, because its life blood is spoken word, will gain most. With a common tongue, with a live national consciousness, the theatre will become to its own as definite instrument of national unity reflecting the national mind, interpreting the national heart and dreaming national dreams for the future.

#### D) Grammar and composition – 25 questions

Read the following passage carefully and answer the questions given below:

Hiero, King of Syracus, had commissioned from a goldsmith of the town a crown of pure gold, but having taken delivery of the finished article, he was suspicious. There was reason to believe that the craftsman had mixed with the gold a certain amount of other metal of inferior value. But how to find out? There was no direct evidence, and it was therefore obviously a case for the learned men of the city. And who more learned than Archimedes?

The mathematician was therefore **charged** with the task which would nowadays be considered a simple one, but was then a matter for serious thought. Nothing known to science could be brought forward to prove fraud or otherwise on the part of the goldsmith.

It is more than probable that the human side of the problem interested Archimedes not at all, but the scientific puzzle worried him **intensely**. This would pursue him everywhere he went for days, and persisted through the routine acts of his daily round.

In the normal course of that routine, he went to the public baths. We can imagine him standing at the edge of the bathtub as he prepares to enter it, absently allowing the water to flow until he cannot help noticing it. Suddenly, he splashed out of his tub, shouting at the top of his voice: "Eureka! Eureka!" (I have found it! I have found it!). Without waiting, or even thinking of such detail as clothes, he **tore out** of the building and rushed through the streets of Syracuse, still shouting: "Eureka! Eureka!"

Arriving at his house, the mathematician put his newly found discovery to a practical test, and found indeed that a body plunged in a fluid loses an amount of its weight which is equal to the weight of the fluid displaced by it. With this as a starting point - as it was to prove the starting point of many **subsequent** discoveries of importance – Archimedes was able to tell his king how much pure gold was in his crown. Thus was the first fundamental law in hydrostatics **enunciated**.

Archimedes was, by this time, well known to his fellow townsmen, and his sometimes strange appearance and **unusual** actions probably met with indulgent smiles. He came from a good family, his father, Pheidias, was an astronomer; he was on intimate terms with, and –according to some – was even a kinsman of King Hiero himself.
